Education

California State University at Monterey Bay
B.S. in Computer Science - Data Science • Graduated: *Fall 2019*

Experience

Tria Federal
Senior Full Stack Engineer - May 2021 - Present

- Lead development across three high-visibility enterprise applications (Self-Nomination, Targeted Review, Exceptions) built using **Angular (TypeScript)**, **NestJS (TypeScript/Express)**, **New Relic**, and **AWS infrastructure**.
- Serve as the technical point of contact in the absence of team leads, authoring **technical specifications**, mentoring junior engineers, and performing final **production sign-offs**.
- Architected **data analytics dashboards** and visualizations with **D3.js**; authored the majority of **SQL metric logic**, now part of a scalable shared widget library.
- Built and deployed services using **Docker containers** on **AWS**, ensuring stability, scalability, and CI/CD compliance. Spearheaded accessibility efforts, implementing **508 compliance** across all applications and passing all government audits.
- Migrated legacy applications to modern versions, improving stability, security, and developer productivity.
- Improved **Jest** unit tests in CI/CD pipeline, decreasing build time by 30%.
- Implemented database query improvements in **TypeORM** and **MySQL**, reducing application load time by 80%.

Visions in Education
Full Stack Developer - September 2020 - May 2021

- Developed web applications in **Angular** and **Python** to streamline student enrollment and physical asset tracking, supporting over 5,000 students at California's largest charter school.
- Built advanced enrollment tracking tools that boosted productivity, allowing for faster student enrollment and reducing manual tracking errors.
- Developed a physical asset and repair tracking system, ensuring compliance with government standard, and completed the project 2 weeks ahead of the deadline.

UC Berkeley Extension
Teacher Assistant - April 2020 - November 2020

- Mentored students in **full-stack data engineering** and **visualizations** using **Python**, **SQL**, and **JavaScript.** Improving comprehension rates and ensuring 100% course completion for mentored students.

Capital Insurance Group
Data Analyst - September 2019 - December 2019

- Built a **PowerBI** dashboard to track call center **KPI's** Including issue tracking, average handle time, and key issue influencer to improve response time in the call center and reduce overall unresolved issues.
- Developed an **ETL pipeline** to link **PowerBI** and **Jira** automating data extraction leading to quicker and more accurate visualizations for decision-making.

Projects

Trip GPT

- Built a website utilizing **Angular, NestJS** and **ChatGPT** to generate AI-drive trip plans.
- Developed a custom chat interface and visualization portal to allow users to plan and visualize trips
- Integrated **ChatGPT** to provide trip contents and chat experience.
- Leveraged **MySQL, TypeORM, RXJS**, and **NestJS** to store users, trips, and conversations.

Agent Swarm for Market Analysis

- Creating a system of AI agents capable of performing market research and publishing content to X, formerly twitter.
- Developed a **Swagger** documented **REST API** that allows autonomous Cod3x agents to request and generate tailored video content based on unstructured input data.
- Hosted on **AWS** for scalability and cost-effective compute usage.

Skills

- **Languages & Frameworks:** TypeScript, JavaScript, Python, MySQL, Angular, React, NestJS, Express, Flask
- **Tools & Platforms:** AWS, Docker, Swagger, PowerBI, Jira, OpenAI API, D3.js, Numpy, Pandas
- **Other:** CI/CD, 508 Accessibility, Mentorship, Technical Spec Writing
